

Brownie Science Booklet

This little booklet can be used to record your experiments and your observations. Leaders might like to use the booklets at a science night with a round robin format. Each station can put a sticker or a stamp on a different page of the booklet.

Fold the booklet in half like a card. Take 1 or 2 pieces of plain paper. Cut them in half so they are 8 ½ inches by 5 ½ inches. Fold them like a card too. Put them inside and staple them together to form the booklet.
